Tools:

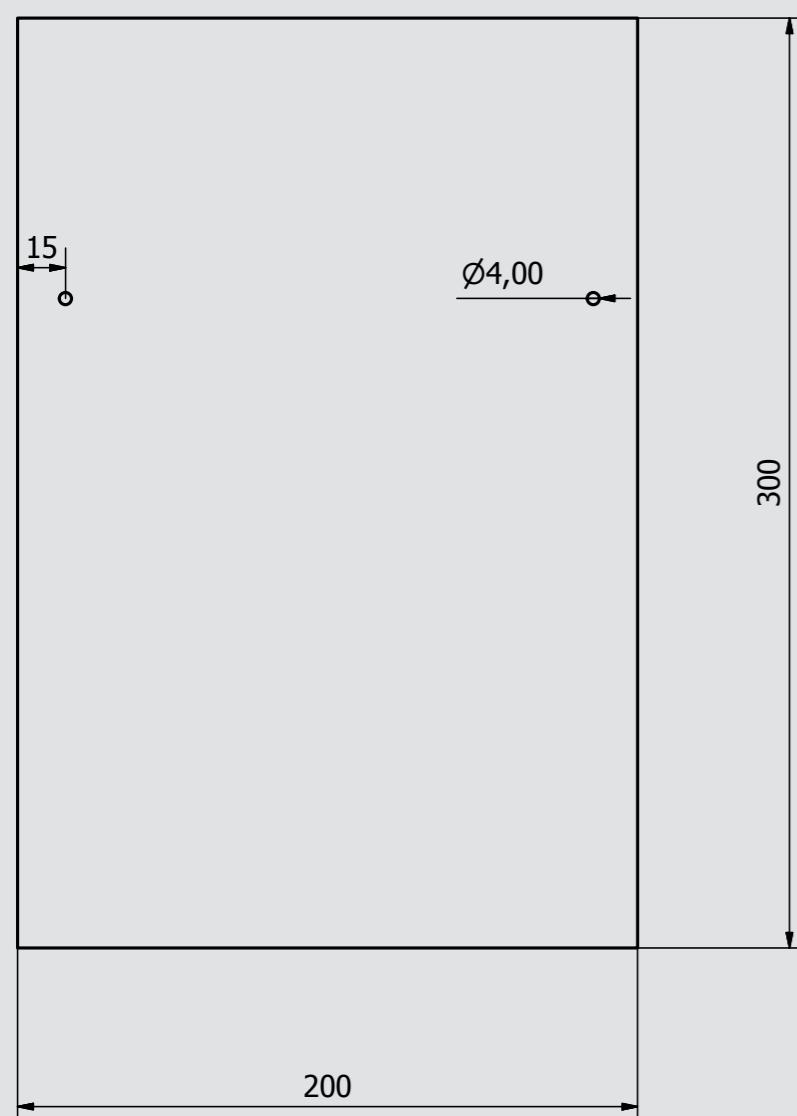

- Screwdriver
- Saw.
- Drill
- Belt sander.
- cooking pot (to curved of the wood)

WoodLight

WoodLight es una pequeña lámpara pensada para iluminar un punto focal bajo ella, para una mesa o escritorio por ejemplo, mientras ofrece una agradable luz ambiente a su alrededor. También juega con el concepto de la translucidez de la madera ofreciendo una lámpara muy diferente cuando está encendida o apagada. Además puede abrirse para ofrecer una mayor zona de iluminación y se puede combinar con otras WoodLight a diferentes alturas para crear una lámpara mas grande.

WoodLight is a small lamp designed as a focus light. For example on a table or a desk. The lamp also provides a Warm light around it. This lamp has two different faces: when it's ON, the wood is translucent while when it's OFF, the wood looks like a solid piece. Finally the lamp can be open to obtain more light and it can be put together with other WoodLights at different heights to make a bigger lamp.

Escala (1 : 2)

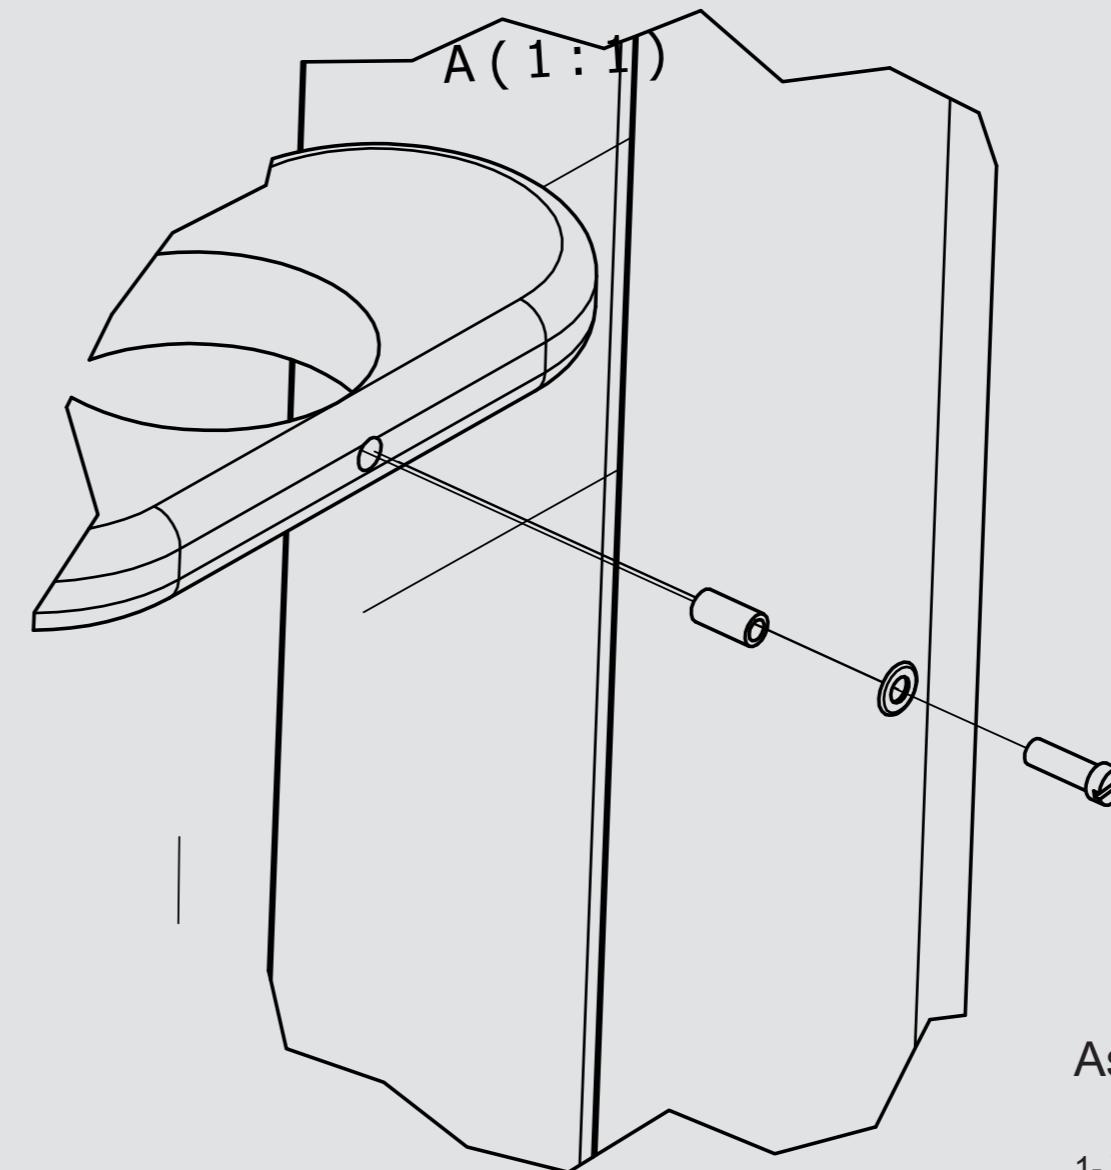

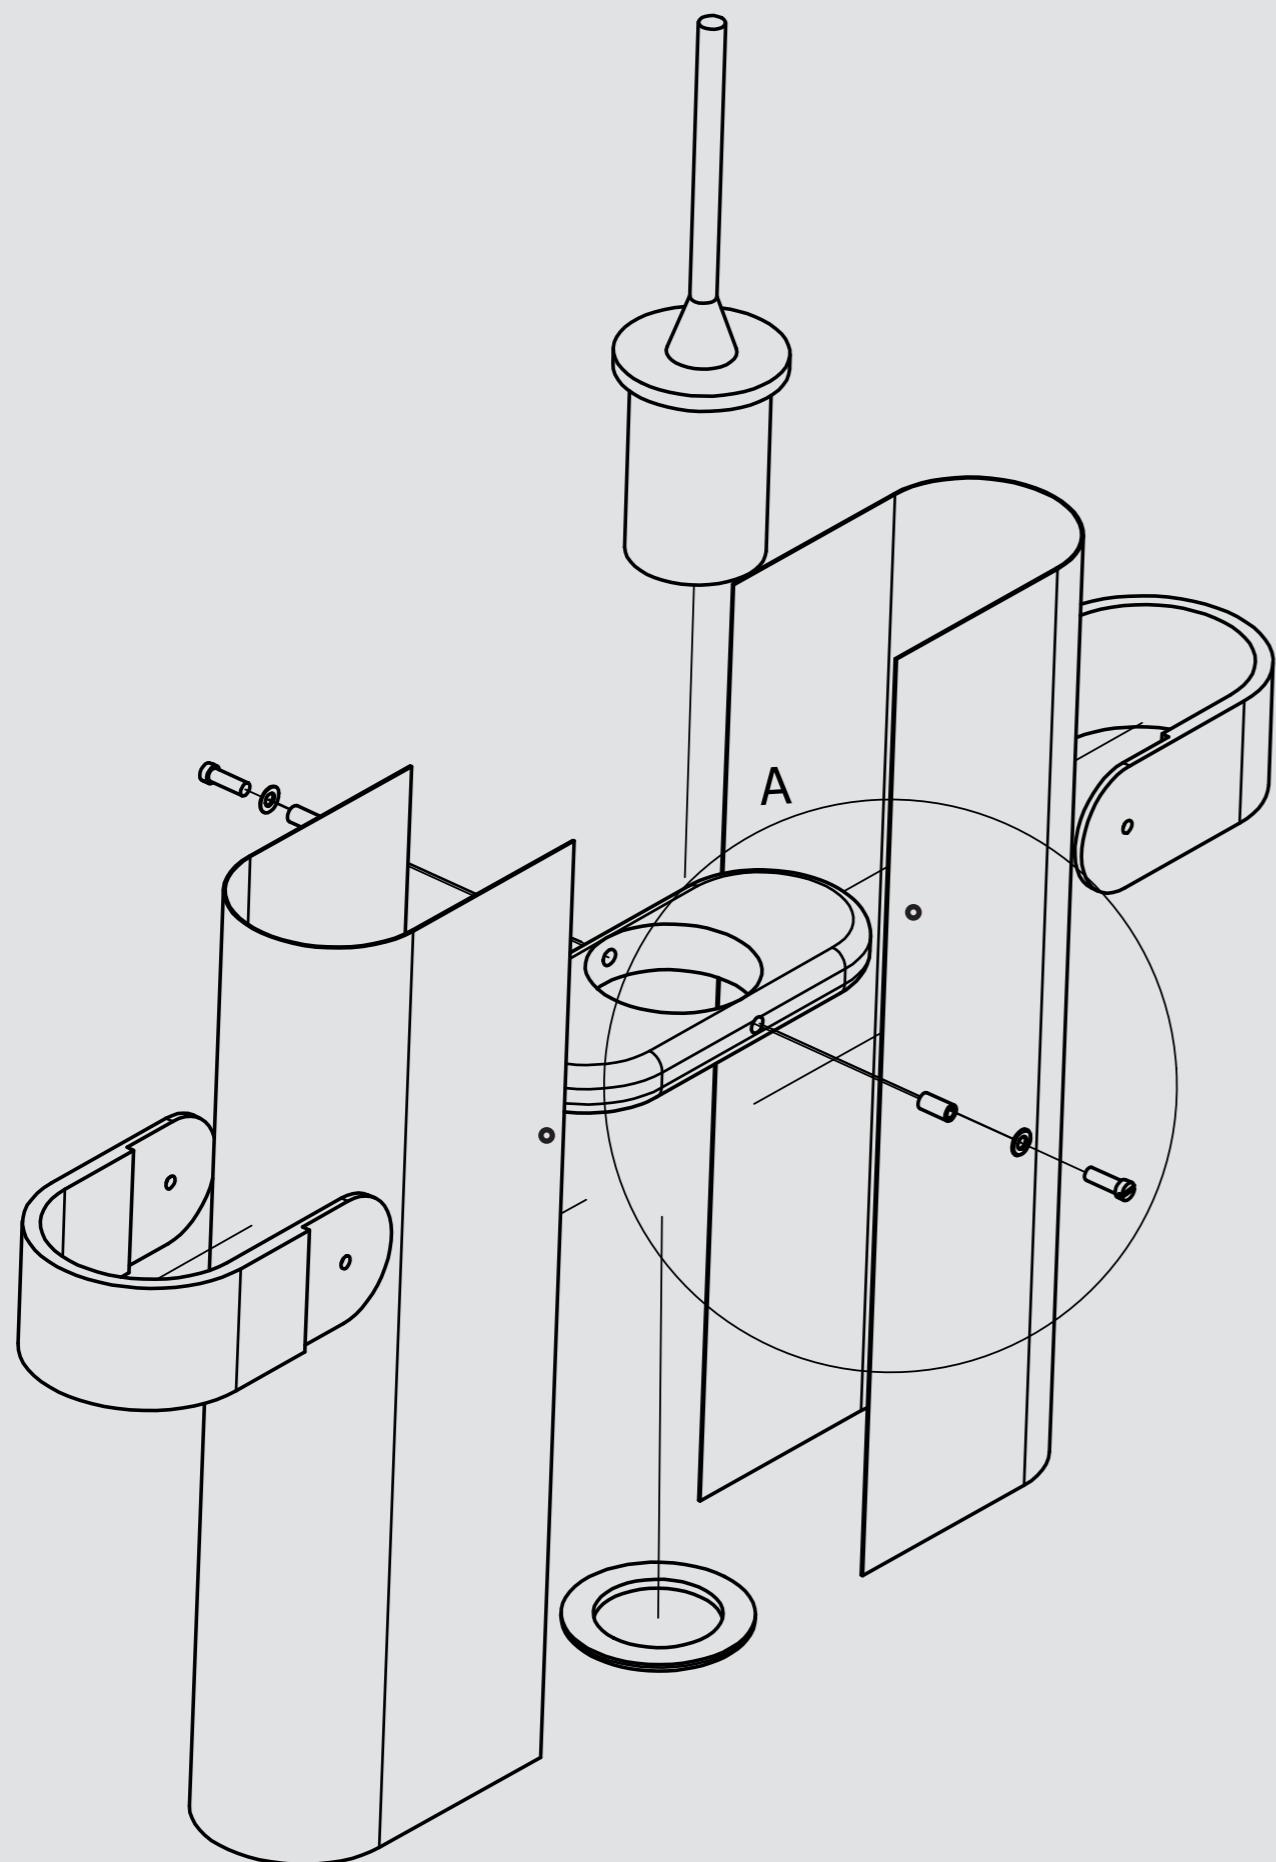

1-Abedul plate 0,5mm

2a-Plywood 10mm

2b-Plywood 5mm

- The materials from 3 to 8 are standard elements. Their properties and measures can change due to the local availability of those elements. for this reason, elements from 3 to 8 are not included in the exploded diagram.
